

I am in favor of XM Radio to be able to broadcast local weather and traffic for local areas. I pay for their service and do not see why a government entity would dictate their broadcast material as long as it is appropriate. Local stations do not broadcast traffic conditions frequently and comprehensively enough to stay on top of the changes. I'm tired of jumping from channel to channel to find a current traffic report. XM has the right idea and I urge you to reject NAB's petition 04-160.

Thank you for your consideration in this manner.
